

hp wireless mobile classroom

Within this decade, we expect that one-to-one e-learning will be the dominant paradigm in K-12 education. Every student and teacher will have a computing device with a wireless broadband connection to the vast educational resources on the Internet. An e-learning revolution is beginning.

HP has teamed up with leading educational technology companies to offer a one-to-one wireless mobile computer classroom solution. The mobile classroom incorporates MobiLAN ONE from Wireless Information Networks (WIN), and laptops, peripherals, and wireless network components from HP.

The mobile classroom provides schools with a transitional solution toward the one-to-one e-learning model and allows them to introduce one-to-one activities into the curriculum throughout the school day to different students and in different environments.

This solution will be delivered to your school by Wireless Information Networks and their skilled technician will instruct your staff on the use of the wireless mobile classroom.

The HP wireless mobile computer classroom:

- WIN's MobiLAN ONE, the first and only motorized wireless computer lab. It's self-propelled so any teacher can easily take it anywhere, and it's safer than those bulky non-motorized units whose weight and momentum can cause serious safety problems. A single class can use all computers or they can be divided up as necessary.
- An on-board wireless transceiver that enables easy access to the Internet from anywhere in the school.
- An automatic charging system that works overnight, with a simple plug in.
- Advanced locking technology for security.
- 30 HP XE3 notebook PCs, each with an HP 802.11b wireless LAN card.
- Prices from \$58,000.

Mobile classroom recommended options:

- NetSchools Orion, the award-winning online curriculum alignment and integration system. For one low price, sign up for an annual subscription to NetSchools Orion for up to eight teachers and administrators and up to 120 students and their parents. Price includes staff training by NetSchools staff. Annual subscription and training: \$9,000.
- An hp all-in-one printer, scanner, copier, fax securely mounted right on top. Prices vary, depending on configuration.
- An hp digital camera.
