

A new vision in education:
**the revolutionary eClass2go
mobile classroom.**

**Freedom
to learn.**

A new vision in education.

- Ultra-mobile classroom supports learning anywhere, anytime
- Stores up to 16 notebook PCs, 2 servers, multi-function printer/scanner/copier, projector, battery rechargers in minimal floor space
- Easily movable from room to room on castors
- Allows tailor-made IT solutions – equip eClass2go with choice of PCs and devices to suit your needs
- Single power cable and internet input enables instant set-up in a classroom environment
- Sturdy steel casing and Kensington cable lock protect against theft and damage
- Central panel tidies away internal cabling and prevents tampering

TOSHIBA

Complete **freedom to learn** anywhere, anytime - all in a single mobile box.

"Lessons are more dynamic and enjoyable, both for myself and my pupils."

Toshiba is committed to supporting education with state-of-the-art computing solutions that deliver maximum mobility and freedom. To enable this vision, Toshiba has developed the revolutionary eClass2go.

eClass2go is a unique tailor-made learning solution. When equipped with your choice of PCs, servers and peripherals, the eClass2go box becomes a self-contained mobile wireless classroom that provides students and teachers with the tools needed to learn anywhere and at anytime.

This innovative concept not only brings the freedom to conduct computer-based education in any location, it also means liberation from cable-based connectivity. With eClass2go you simply plug in one power cable and one internet connection, and the whole classroom wireless network is online, linked and ready to go.

Castors mean the eClass2go can be easily moved from one location to another, enabling students to access up-to-date information without limitations of time and space. There is no longer any need for a dedicated computer classroom, and no need for individual cable connections to server or internet within the classroom.

Lockable for security, the sturdy steel box requires minimal floor space yet offers generous storage capacity. Inside are compartments for up to 16 notebook PCs, 2 wireless-enabled servers to support remote internet and intranet access, integrated printer/scanner/copier, projector, extra batteries and chargers. The actual contents of each eClass2go are user-specified, depending on individual requirements.

Welcome to a new vision in education.
